THE SETUP

MACHINE:

7.5TON WACKER NEUSON
EXCAVATOR

ATTACHMENT:

TG28SR5 FIVE-FINGER
WITH WD14 ROTATOR

APPLICATIONS:

ARBORIST WORK
SANDSTONE
TIMBER HANDLING
EARTHWORKS

SCALING FOR GROWTH

After successfully running an Intermercato grab on a 2-ton machine for 5 years, Sky's The Limit Tree Services needed to scale up their fleet to tackle larger scale and more complex projects.

Stepping up to the larger excavator and Five-Finger Grapple provided the control needed to safely tackle high-risk tree dismantling and heavy material handling, boosting site productivity while keeping ground crews safe and out of harm's way.

FIELD PROVEN PERFORMANCE

UNBELIEVABLE PRODUCTIVITY

Drastically cuts site cleanup times and speeds up material handling, making high-risk tree dismantling far more efficient, enjoyable, and profitable.

PINPOINT ACCURACY

Continuous hydraulic rotation gives awkward timber and heavy sandstone loads "surgeon-like dexterity," allowing precise placement without repositioning the machine.

RUGGED BUILD QUALITY

Extensively tested over 7 years across two machines in dusty and harsh site conditions with zero structural failures.

THE VERDICT

Now running the 5-finger grab on our 7.5-ton Wacker Neuson, it's so **enjoyable, efficient, and safe.**

The productivity and accuracy that the grab brings is unbelievable - it's hard to convey in words.

The **build quality** has held up extremely well. In a high-risk industry with a lot of dust and heavy, odd-shaped loads, both grabs have been **extremely durable.**

If another contractor was on the fence about buying an Intermercato grab, I'd tell them don't hesitate. It **completely revolutionises the way you operate.**
