

Strength • Control • Versatility

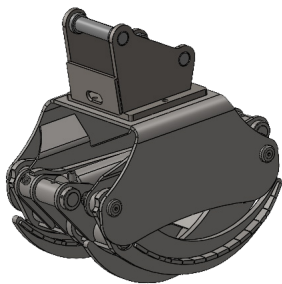

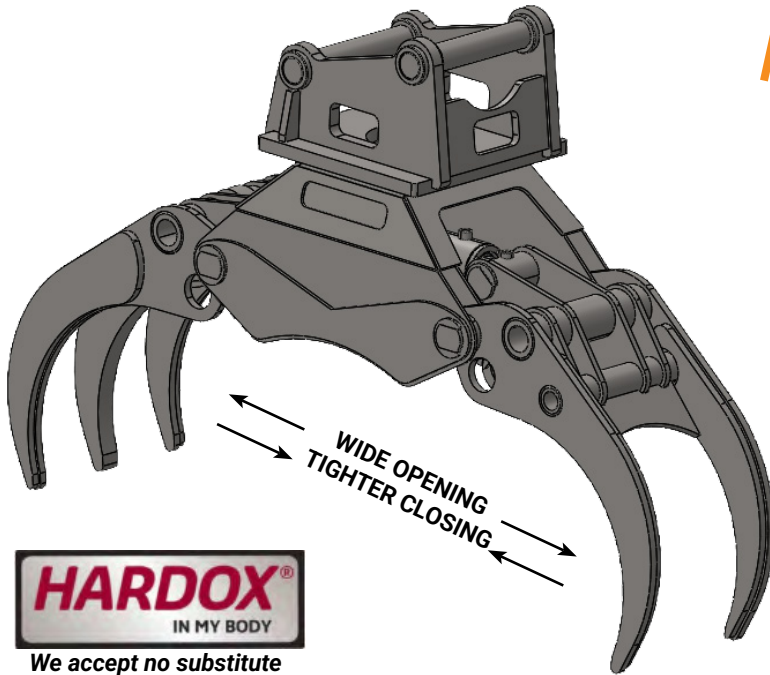

Built tough for chipping, land clearing, demolition and heavy-duty handling. The rigid, non-rotating mount delivers unmatched stability, power and precision.

KEY FEATURES

- Aussie Made Head Bracket – Bolt-on design, flat or angled for tree/pole handling
- European Grapple – HARDOX® construction, wide opening, tight closing
- Exclusive Finger Design – Longer for penetration, control and bunching
- Massive Clamp Force – Unshakable grip on the toughest materials
- Versatile & Durable – Logs, chippers, rocks, scrap, forestry, recycling, demolition
- Low Maintenance – Robust, simple build for long service life
- Future Ready – Rotator can be added later

Why Intermercato?

- European engineered, proven in Australia
- Fits a wide range of excavators
- Backed by local expertise & support

Rotator – upgrade now or later
